Volume 49, 1991, Numbers 1–3

CONTENTS

Number 1/2 PAGE

Angiogenesis in arteries: review: *R. Eisenstein* 1
The involvement of free radicals in the mechanisms of monooxygenases: *R. E. White* 21
Enhancement of anticancer agent activity by selective inhibition of rapidly proliferating tissues of the host: *R. L. Stolfi and D. S. Martin* 43
Principles and practice of DNA filter elution: *K. W. Kohn* 55
Regulation of the metabolism of 1,2-diacylglycerols and inositol phosphates that respond to receptor activation: *S. B. Shears* 79
Chemistry of colchicine: *A. Muzaffar and A. Brossi* 105
Low molecular weight angiogenesis factors: *R. Odedra and J. B. Weiss* 111
Historical aspects of glutathione and cancer chemotherapy: *P. Mistry and K. R. Harrap* 125
Tubulin sulfhydryl groups as probes and targets for antimitotic and antimicrotubule agents: *R. F. Luduena and M. C. Roach* 133

Number 3

Prostaglandin and thromboxane biosynthesis: *W. L. Smith, L. J. Marnett and D. L. DeWitt* 153
Therapeutic potential of plant photosensitizers: *J. B. Hudson and G. H. N. Towers* 181
Organization of intracellular calcium signals generated by inositol lipid-dependent hormones: *T. A. Rooney and A. P. Thomas* 223
Metabolism and action of purine nucleoside analogs: *W. Plunkett and P. P. Saunders* 239
Innervation of the sphincter of Oddi: physiology and considerations of pharmacological intervention in bilary dyskinesia: *J. Toouli and R. A. Baker* 269
Multidrug resistance gene family and chemical carcinogens: *S. S. Thorgeirsson, J. A. Silverman, T. W. Grant and P. A. Marino* 283
Cell surface actions of adriamycin: *T. R. Tritton* 293
Circadian rhythms: principles and measurement: *P. H. Redfern, J. M. Waterhouse and D. S. Minors* 311
Receptor regulation of phosphoinositidase C: *T. F. J. Martin* 329
